PLEIOSPILOS SIMULANS.

PLEIOSPILOS BOLUSI.

SEEDS OF SOUTH AFRICAN SUCCULENTS AND OTHER RARE PLANTS.

- Aloe Arborescens**—A tall growing species which produces a very fine spike of bright coloured flowers. Per pkt 6d., $\frac{1}{4}$ oz 4/-, 1oz 15/-
- Aloe Rubro-Lutea**—An effective Aloe with stems up to 5 feet. Per pkt. 6d, $\frac{1}{4}$ oz 3/-, 1oz 10/-
- Aloe Vera**—A dwarf Aloe with pale green leaves and conspicuous red flower; height when in flower 2ft. Seeds, per doz 9d, 100 3/6.
- Anacampseros Papyracea**—A rare plant of most peculiar formation, the growths being entirely covered with white papery scales; when growing amongst white stones the plants can hardly be detected. Seeds, per doz 1/-.
- Anacampseros Telephiastrum**—A graceful little plant with mauvy pink flowers. Seeds, per doz 1/-.
- Cheirodopsis Cigarettifera**—A dense Mesembrianthemum-like plant the base of which resembles a cigarette-holder; large yellow flowers. Seed, per 2 capsules 1/-.
- Cheirodopsis Ruschia**—This is a rare species of somewhat larger growth than most, handsome greyish-green, the lower segments peculiarly toothed, conspicuous flower. Seed, per capsule 2/-.
- Cheirodopsis Tubercularia**—Like "C. cigarettifera"; the growths are covered with minute tubercles. Seeds, per capsule 1/-.
- Echinus Apiculata**—A handsome, free-flowering, dwarf, compact Mesem.; leaves peculiarly shaped. Seeds, per 2 capsules 1/6.
- Faucaria Felina**—One of the best species of this remarkable genus; growths peculiarly toothed; flowers rich yellow. Seed, per capsule 1/6.
- Gasteria Linguiforme**—Variegated leaves and tall spikes of pink flowers tipped with green. Seeds, per doz. 6d, per 100 2/6.
- Gibbaeum Pachypodium**—The foliage of this species is somewhat different from most Gibbaeums, resembling more the Glottiphyllums; flowers of a delicate pink shade. Seeds, per capsule 1/6.
- Gibbaeum Pubescens**—One of the best of the genus; growths peculiarly shaped, white in colour. Seed, per 2 capsules 1/-.
- Gibbaeum sp.**—A robust species resembling "G. pubescens"; growths pale green in colour. Seed, per 2 capsules 1/-.
- Glottiphyllum Depressum**—A handsome, easily grown species; growths short and broad; large golden yellow flowers, freely produced. Seed, per capsule 1/6.
- Glottiphyllum Longum**—Like "G. depressum" but the leaves often grow to a length of 12 inches. Seeds, per capsule 1/6.
- Glottiphyllum sp.**—All species of this genus make excellent specimens whether in pots or in a rockery. This species resembles the rare "G. Neilii." Seed, per 2 capsules 1/-.
- Hereroa Granulata**—A dwarf Mesembrianthemum bearing bright orange flowers. Seeds, per 2 capsules 1/-.
- Hereroa Stanleyi**—This species produces an abundance of yellow flowers. Seed, per 2 capsules 1/-.
- Pleiospilos Bolusi**—The most sought after of the stemless Mesems., growth in pairs, of stonelike appearance, large flowers of a rich golden yellow. Seeds, per capsule 2/6.
- Pleiospilos Simulans**—A very rare species which should be in every collection. Differs in shape from "P. Bolusi." Seed, per capsule 2/6.

Punctillaria Magnipunctata—A handsome stemless Mesembrianthemum, large bright yellow flowers, one of the best of this type.

Seeds, per capsule 1/-.

Punctillaria Nobile.—In appearance this species much resembles "P. Magnipunctata" except that the growths are longer and narrower and the flowers somewhat larger and richer in colour.

Seeds, per capsule, 1/-.

Rimaria Heathii.—A beautiful stemless Mesem. of shapely form; growths a glossy pale green; makes a fine specimen.

Seeds, per 2 capsules 1/-.

Stapelia Gemiflora—The foliage of this species is variegated and the flowers velvety black.

Seeds, per doz 2/-.

Stapelia Hirsutus—A tall species with purplish black flowers covered with hairy protusions.

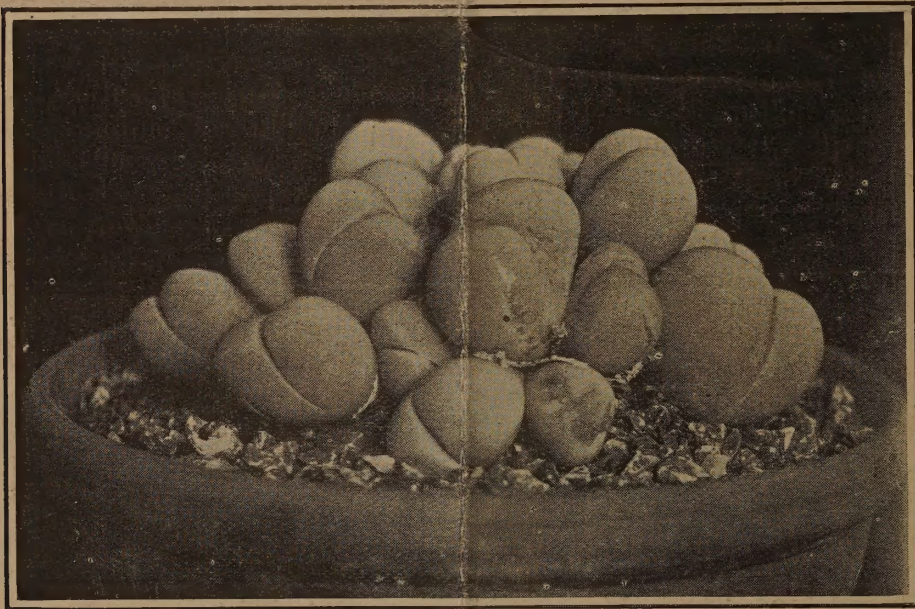

Seeds, per doz 1/6.

Stapelia Variegata—The foliage of this species is particularly handsome, very suitable for miniature rockeries.

Seeds, per doz 1/-.

Trichodiaderma sp.—A handsome diminutive Mesem.; the apex of each growth bears a star-shaped bunch of tiny thorns; a mass of pale mauve flowers when in bloom.

Seeds, per 3 capsules 1/-.

RIMARIA HEATHII.

Remittance must accompany every order.

Payment can be sent in the shape of British Postal Order or Cheque on a London Bank. Cheques on Provincial Banks are also acceptable if the customary exchange on London is added.

Your Address should be clearly written, preferably printed, in order to avoid errors in the addressing of parcels with consequent loss of goods.

Permits. If there are restrictions on the introduction of seeds into your country you should obtain the necessary permit and forward it with your order to avoid disappointment.
